TECH RUNNERS RUN WILD AT HARTFORD

WEAK HITTING RESULTS IN DEFEAT AT TRINITY

Baseball Team Loses Second
Game of Season' 3-2

TECH NINE OUTHITS OPPONENTS
BUT DROP CLOSE CONTEST—
GUIDI ALLOWS FIVE HITS

The Tech baseball stars found harder sailing than their brother track men Saturday when they dropped a hard game to the Trinity ball tossers by virtue of allowing a run to come across the plate in the ninth frame. The final score of the game was 3 to 2. The contest got under way to a slow start and neither team was able to score a run for the first four innings. This was due to the air-tight pitching of "Joe" Guidi for Tech and the fine fielding of the Trinity men.

In the fifth inning, with a man on third and one on first, Guidi balked and allowed a run to score for Trinity. A single over third scored the second Trinity man who had advanced to third.

Tech opened her scoring in that proverbial "lucky seventh" when Brackett was walked, and Neubauer singled. "Joe" Harris layed down a pretty sacrifice bunt, advancing men to second and third. At this point, with but one out Leamy connected with the ball for a beautiful double deep into center field, scoring both Brackett and Neubauer. Tech was retired and the score remained at a tie, so that it looked as if the game would pass into extra innings. In the last of the ninth, with a man on second, Whitaker, the Trinity pitcher, layed down a boulder to Converse who cornered it, but threw wild to first, allowing the winning run to come over the plate.

COSMOPOLITAN CLUB HAS BEEN REORGANIZED

The Cosmopolitan Club, has recently been reorganized after a lapse of several years. The first meeting was held April 16th and plans for future work were made. It was decided at this meeting to hold discussion-group meetings as is done at several of the Fraternities on the Hill. The purpose of this club is to promote fellowship among the foreign students here. It proposes to bring them together once a week for a short business meeting and social hour.

The next meeting is scheduled for next Thursday evening. Officers are to be elected, the Constitution read, and the future program settled on at this meeting. The meeting will be led by George F. Story, director of the Worcester County Service Bureau, who will talk on "Choosing a Life Work."

Later on, when the weather becomes better, the Club will probably get outdoors on hikes and outings.

ATHLETIC FIELD TO HAVE NEW FLAGPOLES

E. F. Miner '87 Provides Funds

The improvements around Tech which were begun at the first signs of Spring are progressing rapidly. The new field house is coming along rapidly.

One of the latest gifts to the college is a pair of flagpoles to be set up on the athletic field. They will be placed, one on each side of the gridiron in front of the bleachers. It is proposed to have the one in front of the home cheering section carry our school banner, while the opposite one will carry the visiting team's emblem. Mr. E. F. Miner of the Class of '87 has given the money for this work.

Professor Carpenter reports that the material has been received for the track curbing and the contract let. Since the work could not be finished in time for the M. A. C. meet, it was decided not to start until May 15 when the track season will be over.

J. C. FAIR SPEAKS AT A. I. E. E.

Captain James C. Fair, District Manager of the New England Tel. & Tel. Co., spoke last Wednesday evening before the Tech Branch of the A. I. E. E. The meeting, held in the E. E. building, was well attended.

Captain Fair traced the development of communication from the early days of the foot messenger and the signal tower to our present means, such as the telegraph, the telephone, radio and wireless.

The development of the telephone from the very crude model invented by Mr. Bell to our highly perfected instrument was sketchily described.

(Continued on Page 2, Col. 1)

PROF. SMITH TO SPEAK AT A. I. E. E. MEETING

First Will be at Niagara Falls

On Monday, May 17, Prof. H. B. Smith will speak at a section meeting of the A. I. E. E. at Cornell University. The annual regional meeting of that district of the A. I. E. E., to be held Wed., Thurs. and Fri., May 26, 27 and 28, will be presided over by him. It is to be held at Niagara Falls, N. Y., and it is estimated that about 1500 people will attend.

The annual sections delegates conference of the A. I. E. E. will be held this year at White Sulphur Springs, Virginia from June 21 to 24. Delegates from all sections are expected to attend. Professor Smith will again preside.

SALT VELOCITY METHOD BECOMES WORLD STANDARD

Professor Allen's Invention Developed at Chaffins

Professor C. M. Allen has again come into the limelight with the announcing of the acceptance of his method for measuring water flow, as standard throughout the world. He, in conjunction with E. A. Taylor of this institute, after having worked on this method for five years, have finally achieved success.

His system is called the salt velocity method of water measurement. It is based on the fact that salt in solution increases the electrical conductivity of water. Salt solution is introduced near the upper end of the conduit, and the passage of the solution across one or more pairs of electrodes, at other points in the conduit, is recorded graphically by electrical recording instruments. The passage of the salt solution between two points is accurately timed and the volume of the penstock between the same points is accurately determined. The discharge in cubic feet per second equals the volume in cubic feet divided by the time in seconds.

So far as is known, no successful application of this method for measuring water has ever been previously made. The first laboratory tests were conducted in 1919 at the institute. In 1922, the first commercial tests were made at the Alden Hydraulic Laboratory here; later on extensive investigations being carried on at the power

TRINITY MEN CAPTURE TWO FIRSTS IN DUAL MEET

Eight New Letters Are Won By Worcester Men As Track Team Emerges Victorious 91 2-3 to 34 1-3

Tech tracksters ran wild last Saturday afternoon in Hartford when they romped away with twelve out of fourteen first places against the Blue and Gold team of Trinity. In addition to copping twelve first honors, Tech came home with seven seconds and three more ties for second places. The meet was run off on a slow track, with a strong wind hindering the runners from turning in any kind of good time.

A. S. M. E. HOLDS BRANCH MEETING

Arthur Nutt '16 Gives Talk on
Aeroplane Development

About fifteen members of the student A. S. M. E. attended the meeting of the Worcester Branch held at the Sherer Restaurant last Friday evening.

Arthur Nutt, a Tech graduate in the class of 1916, and now chief motor engineer of the Curtiss Aeroplane Co. addressed the two hundred odd members present on the "Development of the Aeroplane Engine."

He traced its development from 1916 to the present time, calling attention to the rapid progress attained. Mr. Nutt stated that the sale price of aeroplanes will be greatly decreased with the ultimate production on a quantity basis.

The fact was stressed that there is great opportunity for the young mechanical engineer in metallurgy because of the tremendous value of alloys.

At a business meeting held after the address of the evening Professor H. P. Fairfield was elected to the executive committee of the Worcester section and Mr. R. G. De La Mater was chosen secretary-treasurer.

KNIGHTS OF THE ROAD PLANNING PILGRIMAGE

At a great risk to life and limb, a reporter managed to gain admittance to the meeting of the Knights of the Road, held Tuesday evening at seven p. m. Many interesting things could be said about that stormy meeting but being pledged to secrecy, only a few general announcements may be made.

A committee was appointed to name a day and arrange for a pilgrimage to John Boynton's grave in Mason, New Hampshire. All Knights who have not made this pilgrimage were urged to go.

An initiation committee consisting of Houlihan, Zackrisson, Pierce and Merrill was appointed and something novel and original is promised. This initiation will be held quite soon.

After much argument, a design for a membership pin was chosen and orders will be taken for them.

The Crimson and Grey showed a well balanced team in all of the races and field events, except in the weights, where Tech has been weak for years. The long distance runs involved much jockeying for positions. In the two-mile run both Pearson and Rice finished well in advance of their nearest Trinity competitor. Seranno and Stoughton were the high point gainers for the afternoon, the former winning the century by a safe margin and later leading the pack home in the four-forty, to give him a total of ten points. Stoughton took first place in the one-twenty high hurdles and the broad jump. Thompson followed close on their heels with nine points, by virtue of getting a second place in the two-twenty, the one-twenty high hurdles, and the two-twenty low hurdles.

Several finds were made during the course of the meet. Rice showed that he had the makings of a good distance runner when he finished first in the mile and second in the two-mile. Matulatis showed promise of development in springing up from the unknown to tie for second in both the pole vault and the high jump. Page, Wilcox, McColley, and Germain also broke into the limelight by winning the eight-eighty, two-twenty low hurdles, high jump and pole vault respectively. Dockham continued the good form that he showed last year when he broke the record for the javelin throw and easily captured that event.

One of Trinity's first places came in the shot put, in which event they made a cleanup. The other first was

(Continued on Page 3 Col. 2)

SENIOR CLASS NAMES COMMITTEE CHAIRMAN

A. H. Wendin Has Able Assistants

Pres. Steele of the Senior Class has announced the committee for Commencement which was elected at the class meeting held Thursday noon as follows: A. H. Wendin, chairman, R. H. Alberti, C. J. Thompson, C. B. Hardy and D. F. Sears. This is the general committee which will have charge of all the arrangements.

The Committee has decided to let the Charles H. Elliot Co. of Philadelphia handle the program for commencement which promises to be decidedly unique. The Committee is now at work formulating other plans which will be announced later.

WHY VOTE?

The class meetings and elections on the Hill constitute a miniature political world from the highest officers down to the party bosses. Here, as in the state or national governments, men are to be chosen to fill all sorts of positions, each with its distinctively individual requirements and needs. Here, as in the state and national government, an extremely large number of men are voting blindly, trusting to luck, with absolutely no thought as to whether the man he votes for has the necessary qualifications or not. In filling an office which requires initiative and ability in planning an enterprise involving considerable sums of money, where the class vote will make a difference of five or ten dollars in each man's pocket depending on who is elected, one man after another will get to his feet and vote—just as the man next to him votes.

Perhaps nowhere on the hill is there such a glaring example of sheep following sheep as in the election of minor class officers such as committee chairmen or managers of teams. Several men are up as nominees. The president calls for votes for number one. A group of men, the real supporters of number one rise immediately. A considerable number of others give a hasty look around and straggle to their feet with no real reason for doing so except a vague desire to get the thing over with as quickly as possible. And so it is that number one stands a much larger chance of being elected than any of his competitors. The voters all seem to have the attitude that the minor class officers don't amount to much anyway.

This may be due to the limited amount of time allowed for the meeting and the close proximity of the dinner hour. Empty stomachs are known to have strange influences on men's minds. The fact that a man dislikes being in the minority and the sight of a large number voting for a particular nominee influences him to do likewise may also be considered. But whatever the cause may be the unremedied evil still remains. Even though it is almost time for dinner it surely doesn't take much more time to vote for the right man than for the wrong one. Then again suppose you are in the minority; isn't your own opinion worth more to you than that of any other man in the class. Isn't it worth the additional effort to do your own thinking for once and not let others do it for you; to lead and not to follow?

Every man should get into the habit of weighing the qualifications of each nominee with especial regard to the duties of the office. This in itself is a valuable quality to be cultivated and will save many mistakes in future business life as well as in college. The technical man has a trained mind but unless he can apply that training outside his profession he is missing the full value of his education. Cultivate the critical type of mind and vote intelligently.

A. I. E. E. MEETING

(Continued from Page 1, Col. 2)

Captain Fair particularly stressed the fact that organization made possible our telephone systems. The vast amounts of money spent for improvements and extensions were due to the purchase of telephone stock by the company's own employees.

At a short business meeting held just before the lecture, President Brewster spoke of coming elections, which are to be held shortly. Plans for sending a delegate from the W. P. I. branch of the society to a student convention to be held at M. I. T. on May 7th were also discussed.

Lampy's idea of a diplomatic clergyman is the one who told his Swedish congregation that matches were made in heaven.

plant of the Laurentide Power Company of Grand Mere, Quebec.

Formal adoption of this system as a standard of measurement was made by the International Electrochemical Commission at its meeting in New York last week. This commission undertakes to work up test codes for all prime movers, part of which is an international code for water wheels. This adoption of Professor Allen's method, makes it a standard of measurement through out the engineering world.

INTERFRATERNITY RULES TO BE INTERPRETED

Council Discusses Rushing System

The first meeting of the Interfraternity Council under the new chairman, Professor Albert S. Richey, was held last Tuesday evening, April 20, in the department offices of the Electrical Engineering building.

The main business under discussion was the clear interpretation of the Rushing Rules next year for the benefit of incoming Freshmen. Several committees were appointed for formulating concise definitions and interpretations of certain parts of the Rushing Rules dealing with the hands-off period and the week of rushing in November. The chairman, Professor Richey, will give a talk to the Freshmen some time early next fall on college fraternities in general and the interfraternity work here on the Hill. The advice of the Council to Freshmen in the Tech Handbook will be rewritten by one of the men on the Council.

The next meeting of the Council will be held May 11, 1926.

FOUR DISCUSSIONS TO RUN THIS WEEK

Well Known Men to Speak

The schedule of fraternity discussions group meetings, which are being sponsored by the Y. M. C. A., has been announced for this week by Mr. Swan, who is superintending them, as follows: Tuesday evening, at Alpha Tau Omega and at Theta Upsilon Omega; Wednesday evening, at Theta Chi; Thursday evening at seven o'clock in the "Y" reception rooms, for the Cosmopolitan Club. The Cosmopolitan meeting will also concern itself with election of officers.

The discussion at A. T. O. will be led by Dr. Edward B. Simmons, M. D., who has chosen for the subject "Sex Problems." Perhaps no better local authority on this subject could be found than Dr. Simmons, for he has had much experience with such problems in his many years in hospitals, with the A. E. F.

At T. U. O. the meeting will consider "Christian Ideals in Business and and Professional Honor." This is a

topic which interests all who concern themselves with ethics in any way, and, to lead the discussion, the aid has been secured of Dr. Rust, of the Plymouth Congregational Church and an authority on the history of ethics.

Mr. George Story will lead the discussion at the Cosmopolitan Club meeting immediately after the election of officers has taken place. Mr. Story is the director of the Worcester County Extension Service Bureau, in which position he has had much experience in helping people to solve their vocational and domestic problems. This experience admirably fits him to handle the subject of the evening, which will be "Choosing a Life Work."

At Theta Chi, Dr. McNutt, who has spoken several times at chapel exercises, will lead a discussion of "Legitimate Rewards of Life Work."

The program of chapel services and their leaders for the next week is as follows: Tuesday, Dr. McLaughlin of Piedmont Congregational Church; Wednesday, Thursday and Friday, Dr. MacDonald, of Old South Church; Monday, Tuesday and Wednesday, Rev. V. M. Patterson, of Tatnuck Congregational Church.

Close harmony

Don't think that a college "sing" is the only place for close harmony. The electrical communication industry, too, has applied the big idea.

Four men put their heads together in the research laboratory—and there evolves a new and scientifically accurate basis for the measurement of speech and hearing.

Construction engineers, whose pole lines stride across country, work hand in hand with purchasing engineers who look forty years ahead for the pole supply of the future.

In the factory, engineers and craftsmen together develop new processes and almost-human machines to increase production and effect economies.

Combined ability—that's the thing! In the words of the song, "a long pull, a strong pull, and we'll all pull together."

M. A. C. LOSES
IN RIFLE MEETTech Rifle Team Wins By Score
of 490 to 467

The Tech rifle team continued its winning streak, when it defeated the team representing M. A. C. last week. The superior marksmanship of the Tech team was well illustrated by the score of 490 to 467. Mike Gawlowicz was again high scorer with a 99 to his credit.

There will be a meeting of the Rifle Club Wednesday, April 28, for the election of officers for the ensuing year. The team will bring its season to a close in a match with Amherst College this week.

Scores for the Tech-Aggie match were as follows:

TECH	
Gawlowicz	99
Doyle	99
Horne	98
Schmidt	98
Bliven	97

THREE LOWER CLASSES TO
CONDUCT BOWLING MEET

At the last meeting of the Bowling Club it was voted that an interclass bowling meet be held sometime this week.

The classes have chosen their managers with the exception of the Seniors, who are too busy at this time of year, getting ready for Commencement. The managers are as follows: Roderick Bail, Junior; George Fleming, Sophomore, and Richard Dix, Freshman. Members of various classes were asked to turn in the scores for three consecutive strings, after being witnessed and signed. Then from these representative scores are picked the five highest men who are to represent the class.

At the meet the three number one men will bowl at the same time. These matches to be witnessed by officers of the club or the managers. The team winning the match will be given some sort of a trophy.

Then from these class teams will be picked a team to bowl against the Kiwanis Club. This should prove an

AGGIES TO MEET
TECH TOMORROWPast Records Give Tech Even Chance
To Win

In the third game of the season Tech meets the Mass. Aggies nine on Alumni Field tomorrow afternoon. The team is determined to break into the win column, after losing a heart-rending game to Trinity last Saturday. "Joe" pitched masterly ball, but his teammates could not hit when hits meant runs.

The Mass. Aggie team seems to be fairly strong in their hurling corps with Nash and Davenport, two veteran pitchers and Tufts, a Sophomore who showed promise last year. Captain Temple will either catch or play the infield. McVey and Haertl who played last year will be at their positions at first and second, while two new mem-

bers of the team, Moriarity and Thompson, will probably play short-stop and third respectively. In the outfield Moberg who played right field last year has been shifted to center; Richards is back at left and White, a new man, has been playing right field. The Aggies are fortunate in having almost an entire veteran team. There are but two positions to be filled by new men.

A short business meeting of the Tech News Association was held in B19 Wednesday evening at 5 o'clock. Applications of four men for membership as reporters were accepted. Those who have written their 60 inches of solid type and have been voted in are: S. Holland, F. E. R. Johnson, S. Spencer, and H. E. Pierce all of the Class of 1929.

Although the invaders appear fairly strong in pitching, the Tufts nine had very little difficulty in solving the deliveries of Nash, Davenport, and Tufts for a 17 to 2 victory last Saturday.

Boom and Bucket Distribution

THE Koehring Company provided means for producing Standardized Concrete long before its importance was generally recognized. At the same time the vital importance of operating speed and the saving of time on the job has always been a fundamental consideration in designing Koehring Pavers and Mixers.

One of the basic units of the standard paver, produced in conformity with these principles, is the boom and bucket system for delivering mixed concrete from the drum to the subgrade, developed and perfected by Koehring Company.

This unit because of its many automatic actions cuts down to a minimum the time for placing the mixed concrete on the subgrade; and because it is possible with this method to maintain a uniform and proper consistency of the concrete from the drum to the subgrade without separation of aggregate, the Koehring boom and bucket is an important factor in producing standardized concrete of dominant strength.

Today, the Koehring boom and bucket, Koehring batch meter, Koehring five action re-mixing principle, and the Koehring automatic water measuring tank provide the most positive and accurate means for producing standardized concrete of unvarying uniformity yet devised.

Are You Going
Into the Bond
Business?

There is a cycle of fashion not only for the hats college men wear but for the line of work into which they go.

But your job has to fit your head as well as your hat, for it has to fit your state of mind.

Like your hat also, your job needs to fit your purse.

Therefore, why not choose one that brings not only satisfaction in service but in financial return.

Selling life insurance is one of the few modern businesses that does just this.

It takes:

Intelligence, Zest
and Ability

It gives:

Liberty of action, the philosophic satisfaction of selling future security and present serenity to living people, and a response, immediate and tangible, in monetary as well as mental reward.

NORWICH WINS SLOW CONTEST

Errors Prove Costly in Opening
Game—Score 9-7

DARKNESS FORCES TEAMS TO HALT AFTER DISASTROUS EIGHTH INNING

The Tech baseball team lost its opening game to Norwich University by the score of 9-7 at Alumni Field, April 21st. The game was loosely played and was anybody's game until darkness stopped the game at the end of the eighth inning.

Norwich scored three runs in the first inning on one hit, a base on balls and misplays by the Tech infield. Robinson started in the box for Tech and was given poor support. Norwich scored another in the second and Moran scored for Tech. In this inning the home team had the bases filled but were unable to get the needed hit. Guidi replaced Robinson in the third and held his opponents scoreless but Norwich pushed another run across in the fourth after one man was out on a single by Sherman, a stolen base and another Tech error. Norwich was now leading 5-1. In the fifth, Harris got a base on balls, Moran singled. On a wild throw by the Norwich

shortstop, Harris scored and Moran was held on second. This made the score 5-2.

In the seventh the fireworks began. Leamy, the first man up for the home team, tripled to deep center. Then in rapid order Harris, Kallander and McCarthy got singles. At this stage of the game Houghton, who had replaced Garrity in the box for Norwich, was taken out of the game and replaced by Williams, a left-hander. Guidi drew a base on balls and this brought the lead-off men for Tech to bat. McGarrell singled and Brackett followed with another. Neubauer flied out to centerfield but considerable damage had been done. Five runs had been chalked up and the score was now 7-5 in Tech's favor.

Norwich was not to be outdone, however, and came back strong in the eighth and on four hits and an error pushed across four more runs. In the last of this frame, Leamy, Moran and Converse, who was batting for McCarthy, drew passes, but Leamy overran second and Kallander was called out on strikes to finish the game.

Captain Ed. McGarrell made a pretty running catch of a long foul by Hourin in the fifth. The score:

	ab	r	lb	po	a	e
Sherman ss	5	3	3	2	2	1
B'rdman 3b	4	1	2	3	1	1
Armi lb	2	0	0	4	0	0

NET TEAM DROPS OPENING MATCH

Lord Jeff Racquet Welders Win
From Tech, 6-0

The first tennis match of the year, with Amherst College at Amherst, last Saturday resulted in a 6-0 defeat. The outcome was not so disastrous as it appears because the Crimson and Gray net men had not played a single point out of doors before the match, while Amherst had already played a 3-3 match with West Point and had been practicing outside for a week.

The singles all resulted in straight set victories for the Jeff men. Kranz gave Blanchard a stiff battle in the second set after he got used to the bounce of the ball off clay, and probably would have won if he had been able to get going sooner. Charlie Smith played good tennis in his match and deserved to take a set.

In the doubles, the practice that the Tech players had obtained in the singles gave them more confidence in their strokes and they made a much better showing. Irons and Kranz took the second set away from Libson, the Amherst captain, and Blanchard 6-2. The Tech team's lobbing from the back court coupled with fine overhead play at the net on the part of both men, and Kranz's sharp volleying had their opponents on the run. They tired in the last set, though, and lost 6-2, 2-6, 6-2.

Fogg and Smith put up a good battle in their doubles match and went down fighting 6-3, 8-6.

Scores: singles, Blanchard (A) d. Kranz (W) 6-2, 6-4, Libson (A) d. Irons (W) 6-1, 6-2, Sears (A) d. Smith (W) 6-2, 6-3, Evers (A) d. Fogg (W) 6-0, 6-1.

Doubles:
Blanchard and Libson (A) d. Irons and Kranz (W) 6-2, 2-6, 6-2; Sears and Pilat (A) d. Fogg and Smith (W) 6-3, 8-6.
